INDEX, VOLUME 89

A

Accuracy of the airborne economical radiometer. (2 figs.) P. M. Kuhn. 285–287.

Agricultural meteorology:
Moisture and cotton at harvest time in the Mississippi Delta. (9 figs.) J. A. Riley. 341–353.

Air pollution:
The Nashville daily air pollution forecast. (6 figs.) Carl M. Boettger and Harold J. Smith. 477–481.
Tropospheric ozone: An air pollution problem arising in the Washington, D.C. metropolitan area. (11 figs.) R. C. Wanta, W. B. Moreland, and H. E. Heggestad. 289–296.

Alaka, M. A.:
The occurrence of anomalous winds and their significance. (13 figs.) 482–494.

Alaska:
Squall line passage at Barrow, Alaska, June 21, 1960. (4 figs.) [Weather Note] Ronald J. McCue, Jr. and G. Philip Weber. 411–413.

Analysis of clear air turbulence during April 1960. (4 figs.) DeVer Colson. 94–98.

Analysis of satellite infrared radiation measurements on a synoptic scale. (11 figs.) Melvin Weinstein and Verner E. Suomi. 419–428.

Andrews, J. F.:
The weather and circulation of October 1960. (11 figs.) 24–30.
The weather and circulation of March 1961—Another mild month in the United States. (11 figs.) 205–210.
The weather and circulation of August 1961—Record heat from the northern Plains to the Pacific coast. (6 figs.) 495–500.

Angell, J. K.:
and D. H. Pack. Estimation of vertical air motions in desert terrain from tetroon flights. (13 figs.) 273–283.

Another view from TIROS I of a severe weather situation—May 16, 1960. (13 figs.) Linwood F. Whitney, Jr. 447–460.

Antarctica:
Description of the 50-mb. patterns over Antarctica in 1958. (17 figs.) N. J. Ropar and T. I. Gray, Jr. 45–52.
Some aspects of the thermal energy exchange on the South Polar snowfield and Arctic ice pack. (3 figs.) Kirby J. Hanson. 173–177.

Arctic regions:
Some aspects of the thermal energy exchange on the South Polar snowfield and Arctic ice pack. (3 figs.) Kirby J. Hanson. 173–177.

Atmosphere. Circulation:
Behavior of the principal harmonics of selected 5-day mean 500-mb. charts. (13 figs.) Robert L. Haney. 391–396.
Description of the 50-mb. patterns over Antarctica in 1958. (17 figs.) N. J. Ropar and T. I. Gray, Jr. 45–52.
Mean circulation patterns based on 12 years of recent Northern Hemisphere data. (14 figs.) James F. O'Connor. 211–227.
The occurrence of anomalous winds and their significance. (13 figs.) M. A. Alaka. 482–494.
On short- and long-term variations in quasi-barotropic flow. (22 figs.) A. Wiin-Nielsen. 461–476.
Some aspects of a cycle of available potential energy. (9 figs.) Jay S. Winston and Arthur F. Krueger. 307–318.

B

Behavior of the principal harmonics of selected 5-day mean 500-mb. charts. (13 figs.) Robert L. Haney. 391–396.

Bingham, Christopher:
Distributions of weekly averages of diurnal temperature means and ranges about harmonic curves. (6 figs.) 357–367.

Blanc, Milton L.:
A comparison of methods for computing daily mean values of dry bulb temperature, dew point, and relative humidity. (10 figs.) 401–410.

Boettger, Carl M.:
and Harold J. Smith. The Nashville daily air pollution forecast. (6 figs.) 477–481.

Bradford, Robert E.:
and Oskar M. Essenwanger and William W. Vaughan. On verification of upper-air winds by vertical shear and extremes. (3 figs.) 197–204.

Brier, Glenn W.:
and Dwight B. Kline. Some experiments on the measurement of natural ice nuclei. (7 figs.) 263–272.

Brown, John A.:
and James R. Neilon. Case studies of numerical wind analyses. (7 figs.) 83–90.

C

Carlson, Toby N.:
Lee-side frontogenesis in the Rocky Mountains. (13 figs.) 163–172.

Case studies of numerical wind analyses. (7 figs.) John A. Brown and James R. Neilon. 83–90.

and Dwight B. Kline. Some experiments on the measurement of natural ice nuclei. (7 figs.) 263–272.

Brown, John A.:
and James R. Neilon. Case studies of numerical wind analyses. (7 figs.) 83–90.

C

Carlson, Toby N.:
Lee-side frontogenesis in the Rocky Mountains. (13 figs.) 163–172.

Case studies of numerical wind analyses. (7 figs.) John A. Brown and James R. Neilon. 83–90.

CHIU, WAN-CHENG:
The probing of the tropopause by balloons that follow it—a suggestion. 297–298.
CLAPP, PHILIP F.:
Normal heat sources and sinks in the lower troposphere. (10 figs.) 147–162.
Clear air turbulence:
Analysis of clear air turbulence during April 1960. (4 figs.) DeVer Colson. 94–98.
A note on clear air turbulence during April and May 1960. (5 figs.) Frank J. Smigielski. 91–93.
Climatology:
Behavior of the principal harmonics of selected 5-day mean 500-mb. charts. (13 figs.) Robert L. Haney. 391–396.
A comparison of methods for computing daily mean values of dry bulb temperature, dew point, and relative humidity. (10 figs.) Milton L. Blanc. 401–410.
Distributions of weekly averages of diurnal temperature means and ranges about harmonic curves. (6 figs.) Christopher Bingham. 357–367.
Low-level inversion frequency in the contiguous United States. (9 figs.) Charles R. Hosler. 319–339.
Moisture and cotton at harvest time in the Mississippi Delta. (9 figs.) J. A. Riley. 341–353.
The precipitation day statistic. (5 figs.) C. K. Vestal. 31–37.
Sunshine-cloudiness relationships in the United States. (11 figs.) Roy L. Fox. 543–548.
The zonal wind field along 80° W. for the IGY period and Northern Hemisphere anomalies of wind and temperature. (8 figs.) William M. McMurray. 549–554.
Cloud streets over the Caribbean Sea. (8 figs.) John Schuetz and Sigmund Fritz. 375–382.
Clouds:
Another view from TIROS I of a severe weather situation—May 16, 1960. (13 figs.) Linwood F. Whitney, Jr. 447–460.
Cloud streets over the Caribbean Sea. (8 figs.) John Schuetz and Sigmund Fritz. 375–382.
Radar echo of a mountain wave on February 15, 1960. (4 figs.) [Weather Note] DeVer Colson, Charles V. Lindsay, and James H. Hand. 17–19.
Satellite pictures and meteorological analyses of a developing Low in the central United States. (17 figs.) Andrew Timchalk and Lester F. Hubert. 429–445.
A Southern Hemisphere case study with TIROS I data. (13 figs.) Lester F. Hubert. 229–242.
Sunshine-cloudiness relationships in the United States. (11 figs.) Roy L. Fox. 543–548.
A western Atlantic vortex seen by TIROS I. (7 figs.) J. B. Jones. 383–390.
COLSON, DEVER:
Analysis of clear air turbulence during April 1960. (4 figs.) 94–98.
and Charles V. Lindsay and James H. Hand. Radar echo of a mountain wave on February 15, 1960. (4 figs.) [Weather note] 17–19.
A comparison of methods for computing daily mean values of dry bulb temperature, dew point, and relative humidity. (10 figs.) Milton L. Blanc. 401–410.
Computation and uses of gradient winds. (1 fig.) Roy M. Endlich. 187–191.
Correspondence:
The probing of the tropopause by balloons that follow it—a suggestion. Wan-Cheng Chiu. 297–298.
CRESSMAN, GEORGE P.:
A diagnostic study of mid-tropospheric development. (13 figs.) 74–82.

D

Description of the 50-mb. patterns over Antarctica in 1958. (17 figs.) N. J. Ropar and T. I. Gray, Jr. 45–52.
Diagnosis of divergence in a three-parameter numerical prediction model. (5 figs.) A. Wiin-Nielsen. 67–73.
A diagnostic study of mid-tropospheric development. (13 figs.) George P. Cressman. 74–82.
DINWIDDIE, FRANK B.:
Tornadoes near Nags Head, N.C., in May and June 1960. (6 figs.) [Weather note] 20–23.
Distributions of weekly averages of diurnal temperature means and ranges about harmonic curves. (6 figs.) Christopher Bingham. 357–367.
The "double eye" of hurricane Donna. (3 figs.) [Weather note] C. L. Jordan and Frank J. Schatzle. 354–356.
DUNN, GORDON E.:
The hurricane season of 1960. (5 figs.) 99–108.

E

The effect of differential friction between land and water on the movement of Donna in the vicinity of eastern North Carolina. (1 fig.) [Weather note] Eugene W. Hoover. 340.
ENDLICH, ROY M.:
Computation and uses of gradient winds. (1 fig.) 187–191.
ESSENWANGER, OSKAR M.:
and Robert E. Bradford and William W. Vaughan. On verification of upper-air winds by vertical shear and extremes. (3 figs.) 197–204.
Estimation of vertical air motions in desert terrain from tetroon flights. (13 figs.) J. K. Angell and D. H. Pack. 273–283.

Evapotranspiration:
Graphical solution of the Penman equation for potential evapotranspiration. (3 figs.) John C. Purvis. 192–196.
Excessive rainfall in the Montgomery, Ala. area on August 31, 1961. [Weather note] Arthur R. Long. 501.

F

Forecasting precipitation with the air of a high-speed electronic computer. (7 figs). Joseph Vederman. 243–250.
Forecasts:
The Nashville daily air pollution forecast. (6 figs.) Carl M. Boettger and Harold J. Smith. 477–481.
Forecasts. Numerical:
Case studies of numerical wind analyses. (7 figs.) John A. Brown and James R. Neilon. 83–90.
Diagnosis of divergence in a three-parameter numerical prediction model. (5 figs.) A. Wiin-Nielsen. 67–73.
A diagnostic study of mid-tropospheric development. (13 figs.) George P. Cressman. 74–82.
Forecasting precipitation with the aid of a high-speed electronic computer. (7 figs.) Joseph Vederman. 243–250.
A proposed staggered-grid system for numercial integration of dynamic equations. (2 figs.) D. K. Lilly. 59–65.
The reduction of truncation error by extrapolation techniques. (5 figs.) W. Lawrence Gates. 115–124.
FOX, ROY L.:
Sunshine-cloudiness relationships in the United States. (11 figs.) 543–548.
FREDERICK, RALPH H.:
A study of the effect of tree leaves on wind movement. (4 figs.) 39–44.
FRITZ, SIGMUND:
and John Schuetz. Cloud streets over the Caribbean Sea. (8 figs.) 375–382.
Fronts:
Lee-side frontogenesis in the Rocky Mountains. (13 figs.) Toby Y. Carlson. 163–172.

G

GATES, W. LAWRENCE:
The reduction of truncation error by extrapolation techniques. (5 figs.) 115–124.
GELHARD, ROBERT H.:
The weather and circulation of December 1960—An unusually cold month in the United States. (10 figs.) 109–114.
The weather and circulation of May 1961—Persistent cool weather in the United States. (10 figs.) 299–305.
GENTRY, R. CECIL:
and Robert H. Sourbeer. Rainstorm in southern Florida, January 21, 1957. (8 figs.) [Weather note] 9–16.
Graphical solution of the Penman equation for potential evapotranspiration. (3 figs.) John C. Purvis. 192–196.

Accuracy of the airborne economical radiometer. (2 figs.) P. M. Kuhn. 285–287.
Rainstorm in southern Florida, January 21, 1957. (8 figs.) [Weather note] Robert H. Sourbeer and R. Cecil Gentry. 9–16.
Recent articles in other Weather Bureau periodicals. 98, 186, 284, 502, 578.
The reduction of truncation error by extrapolation techniques. (5 figs.) W. Lawrence Gates. 115–124.
Relative catches of snow in shielded and unshielded gages at different wind speeds. (5 figs.) Leonard L. Weiss. 397–400.
Relative motion of hurricane pairs. (7 figs.) Eugene W. Hoover. 251–255.
RILEY, J. A.:
Moisture and cotton at harvest time in the Mississippi Delta. (9 figs.) 341–353.
Rocky Mountains:
Lee-side frontogenesis in the Rocky Mountains. (13 figs.) Toby Y. Carlson. 163–172.
ROPAR, N. J.:
and T. I. Gray, Jr. Description of the 50-mb. patterns over Antarctica in 1958. (17 figs.) 45–52.

S

Satellite meteorology:
Analysis of satellite infrared radiation measurements on a synoptic scale. (11 figs.) Melvin Weinstein and Verner E. Suomi. 419–428.
Another view from TIROS I of a severe weather situation—May 16, 1960. (13 figs.) Linwood F. Whitney, Jr. 447–460.
Cloud streets over the Caribbean sea. (8 figs.) John Schuetz and Sigmund Fritz. 375–382.
Satellite pictures and meteorological analyses of a developing Low in the central United States. (17 figs.) Andrew Timchalk and Lester F. Hubert. 429–445.
A Southern Hemisphere case study with TIROS I data. (13 figs.) Lester F. Hubert. 229–242.
Satellite meteorology—Continued
A western Atlantic vortex seen by TIROS I. (7 figs.) J. B. Jones. 383–390.
Satellite pictures and meteorological analyses of a developing Low in the central United States. (17 figs.) Andrew Timchalk and Lester F. Hubert. 429–445.
SCHATZLE, FRANK J.:
and C. L. Jordan. The "double eye" of hurricane Donna. (3 figs.) [Weather note] 354–356.
SCHUETZ, JOHN:
and Sigmund Fritz. Cloud streets over the Caribbean Sea. (8 figs.) 375–382.
SMIGIELSKI, FRANK J.:
A note on clear air turbulence during April and May 1960. (5 figs.) 91–93.
SMITH, HAROLD J.:
and Carl M. Boettger. The Nashville daily air pollution forecast. (6 figs.) 477–481.
SMITH, ROBERT L.:
and David W. Holmes. Use of Doppler radar in meteorological observations. (9 figs.) 1–7.
Some aspects of a cycle of available potential energy. (9 figs.) Jay S. Winston and Arthur F. Krueger. 307–318.
Some aspects of the thermal energy exchange on the South Polar snowfield and Arctic ice pack. (3 figs.) Kirby J. Hanson. 173–177.
Some experiments on the measurement of natural ice nuclei. (7 figs.) Dwight B. Kline and Glenn W. Brier. 263–272.
SOURBEER, ROBERT H.:
and R. Cecil Gentry. Rainstorm in southern Florida, January 21, 1957. (8 figs.) [Weather note] 9–16.
A Southern Hemisphere case study with TIROS I data. (13 figs.) Lester F. Hubert. 229–242.
Squall line passage at Barrow, Alaska, June 21, 1960. (4 figs.) [Weather note] Ronald J. McCue, Jr. and G. Philip Weber. 411–413.
STARK, L. P.:
The weather and circulation of February 1961—An example of attenuation in the long-wave pattern. (7 figs.) 178–184.
The weather and circulation of June 1961—A hot dry month in the West. (8 figs.) 368–373.
Stratosphere:
Time section and hodograph analysis of Churchill rocket and radiosonde winds and temperatures. (13 figs.) Sidney Teweles. 125–136.
A study of the effect of tree leaves on wind movement. (4 figs.) Ralph H. Frederick. 39–44.
Sunshine-cloudiness relationships in the United States. (11 figs.) Roy L. Fox. 543–548.

CORRECTION NOTICES

Vol. 88, Aug. 1960:

p. 290: Under section 4, the reference to the map of monthly mean circulation in line 2 should be to figure 7; the figure referred to in line 8 from the bottom of that column should be figure 6.

p. 291: In column 1, line 8, reference should be to figure 7.
